Life Sciences in Saxony

Saxony is one of Germany's most dynamic life science regions.

Excellent fundamental research with an interdisciplinary focus is the driving force behind the dynamic development in Saxony's life science branch. Approx. 250 biotechnology, medical technology, and pharmaceutical companies – including the pharmaceutical giant GlaxoSmithKline with its flu vaccine center in Dresden – cooperate successfully with more than 30 research institutions focusing on the sectors regenerative medicine / therapies / diagnostics, molecular bioengineering, bioinformatics, nano biotechnology as well as pharmacogenetics.

The leading research centers for regenerative medicine include Leipzig University's Saxonian Incubator for Clinical Translation (SIKT) and the Center for Regenerative Therapies Dresden (CRTD). Saxony also has three interdisciplinary innovation centers – B CUBE Dresden (molecular bioengineering), ICCAS Leipzig (computer assisted surgery), and OncoRay Dresden (medical radiation research).

Vibrant clusters can be found specifically around the technology centers BIO CITY LEIPZIG and BioInnovationCenter Dresden. On more than 35,000 sqm of floor space, science and business work hand in hand – centrally located and in the immediate vicinity of leading scientific institutions and university hospitals.

www.business-saxony.com

ولاية ساكسونيا هي إحدى المناطق الأكثر ديناميكية في علوم الحياة في ألمانيا.

البحوث الأساسية الفاخرة مع التركيز على الإختصاصات هو القوة الدافعة وراء التطور الديناميكي لفرع علوم الحياة في ولاية ساكسونيا. هناك قرابة الـ 250 مؤسسة في مجالات التكنولوجيا الحيوية والتكنولوجيا الطبية وشركات إنتاج الأدوية - بما في ذلك شركات إنتاج الأدوية العملاقة مثل مركز جلاكوسميثكلين المتخصص بإنتاج لقاح الإنفلونزا في مدينة درسدن، حيث تقوم هذه المؤسسات بالتعاون وبرعاية العمل المشترك والمكمل بالنجاح مع حوالي 30 من معاهد البحوث والتركيز على مجالات الطب التجديدي/العلاج/التشخيص والبيوتكنولوجيا الجزيئية والمعلوماتية الحيوية، وكذا على تكنولوجيا النانو - الحيوية وعلم الوراثة الدوائي.

وتعتبر الحاضنة السكسونية لعمليات نقل الخلايا سريريا في جامعة لايبزيغ (SIKT) ، ومركز الطب التجديدي للعلاج في مدينة دريسدن (CRTD) بين مراكز البحوث الرائدة للطب التجديدي. في ولاية ساكسونيا توجد أيضا ثلاثة مراكز متعددة التخصصات للابتكارات وهي مركز "B CUBE" في مدينة دريسدن للبيوتكنولوجيا الجزيئية ومركز (ICCAS) في مدينة لايبزيغ للبحوث المتعلقة بتطوير عمل الحاسوب. ومركز "OncoRay" في مدينة درسدن« للبحوث الإشعاعية في المجالات الطبية.

وتتواجد الكتل الحيوية على وجه التحديد في المركز التكنولوجي في مدينة لايبزيغ - البيولوجية وفي مركز الابتكارات مدينة درسدن وعلى مساحة مقدارها أكثر من 35,000 متر مربع يعمل المتخصصون في الإقتصاد والعلوم جنبا إلى جنب في مراكز المدن وعلى مقربة من المعاهد العلمية الرائدة والمستشفيات الجامعية.

Brändl Textil

As a family business, we have been extremely successful in Germany for over 60 years in this tradition-steeped, innovative and creative sector. With entrepreneurial spirit, passion, dedication and creativity, we want to continue to develop ourselves.

Our goal is not just to be a supplier of textiles, but to convince as a service provider with product and service. They are our focus. We constantly strive to further develop our products and service. We are also close to the dignity of humans and the environment as a very high responsibility factor.

Due to high stock, our own clothing and embroidery in the house, as well as our network of service providers, we are able to respond quickly to customer requests. Each product can be individually and quickly implemented according to customer requirements. Smallest quantities, in size, shape and design can be made. The Brändl Textil GmbH will convince you with innovation, creativity, individuality and professional competence as your textile outfitter for hotel, object, care and children's area.

LEA Medizintechnik is a German company, located in Giessen close to the international airport Frankfurt. We develop hard- and software and produce our medical diagnosis devices at our company. Our devices are based on optical technologies for non-invasive diagnosis. A highly motivated team of engineers ensures high quality and technique at the edge of technology. Our methods are mostly worldwide patented. We are looking for powerful and dedicated distributors. The major LEA device family is called O2C (oxygen to see) and is established in the fields of angiology, vascular surgery, plastic surgery and transplant surgery as a reliable diagnosis systems. Especially for investigations at patient with diabetic foot syndrome, O2C can help to salvage their foot. In the field of vascular surgery O2C can be used for diagnosis of critical limb ischemia, of wound healing prognosis and to determine the amputation level. The post operatively monitoring of micro-vascular flaps is a standard application of O2C in the plastic- and maxillofacial surgery departments.

Reha & Medi Hoffmann GmbH

Hauptstr. 43b
04683 Naunhof – Germany
Phone: +49 341 39284960
info@rehamedi.de
www.rehamedi.de, www.earlymobilization.com

Reha & Medi Hoffmann GmbH offers products for therapy and care. Inhouse engineering and production ensures steady high quality products with unique and patented features. These major advantages in the application also improve the economic targets of professional users. Our product brands Mobilizer und Curalizer are used in intensive care units of renowned hospitals as well as in nursing facilities.

Mobilizer

Early and initial mobilization plays an essential role in the healing process of an intensive care patient. Due to these enhanced healing processes, clinics reduce the effort and duration of therapy and thus benefit from clear savings possibilities. Our Mobilizer product line provides enormous support for early and initial mobilisation and care of weak and immobile patients. In addition with our innovative vibration module installed in the footplate of Mobilizer Medior, verticalisation and vibration can be combined.

Curalizer

The Curalizer is a comfortable solution to mobilize patients. It can be adjusted in one continuous movement from comfortable resting position to standing aid. The working height can be adjusted individually in each position, guaranteeing medical staff a back-friendly working posture. The Curalizer® with its excellent steering mechanism is ideal for patient transport.

Wheelchair manufactory Bräunig builds indoor-wheelchairs with a very compact design. This guarantees the best maneuverability, no matter how big the patient is. The timeless design omits everything superfluous. We are proud to present our wheelchairs to you at the Arab Health Congress. Handrim-propelled, foot-propelled, attendant-propelled or electric: different costumers need different solutions. This is why more than 50 % of our wheelchairs are custom made.

From big to small: We offer broad heavy duty wheelchairs for patients with adiposity and small transport wheelchairs for easy maneuverability.

Custom made: You get the wheelchair you want. If you cannot find it in our catalogue, we can build it from scratch.

Easy to handle: Comfortable seating and convenient maneuverability. Thanks to our special backrest with two flip-up armrest, getting in and out of the wheelchair is always and from all sides possible. This eases the job for nursing staff.

Robust: Our high quality wheelchairs are made out of precision steel. That is why we offer a lifelong warranty.

From clinics, to apartments, to boats, to planes: Our wheelchairs are the right choice, if it comes to custom design or maneuverability in narrow spaces.

Samed GmbH Dresden

Bamberger Str. 7
01187 Dresden – Germany

Individuality Comes First

Individuality comes first for stamos + braun prothesenwerk gmbh. For each and every person the needs are unique, and so are the restorations which stamos + braun prothesenwerk gmbh offer with their wide product spectrum of finger prosthetics, partial hand prosthetics, arm prosthetics as well as toe prosthetics, forefoot prosthetics and leg prosthetics.

Also mobility is an important part of our quality of life – at any age. stamos + braun prothesenwerk gmbh is working on maintaining or restoring mobility. Our challenge is to see the world through the eyes of our patients, so we can help with our products, our knowledge and our service to improve the quality of life.

With our prostheses we will give back the mobility to our patients so they can engage in activities of daily life and leisure without major restrictions. This, of course, will always require a restoration which matches the individual needs. The optimal type of restoration will be worked out in consultation with our team.

Each restoration is a small work of art, that fascinates particular by the individually matched and natural shape and color design. In addition, there is the benefit of functional advantages and high wearing comfort.

Whatever your needs are, we have the solution for you.

Digital bite registration that is simple and reproducible?

The centric jaw relation is fundamental to the production of functional dental prostheses. Centric Guide® is a digital system which can be used to determine the centric of each patient clearly and, above all, reproducibly, and transfer it immediately to a centric bite registration in a single step. For the first time, the system records all movements of the lower jaw in the vertical dimension. This makes it possible to reproducibly determine the centric relation at the highest point of the fossa. At the same time, the system is impressively easy to use. A Centric Guide® bite analysis takes just a few minutes and is completely pain-free. The Centric Guide® system can be used for bite registration and functional diagnostics in all ranges of indications, i.e. in dentulous, partially dentulous and edentulous masticatory systems. This means that jaw misalignments can be treated precisely, and reworking caused by the patient's bite can be avoided.

Centric Guide® is the standard for reproducible bite registration, Made in Germany – Try it for yourself!

A BUSINESS LOCATION AT ITS BEST

- Located in the heart of Europe: For centuries, Saxony has been the intersection of Europe's major thoroughfares
- DHL Hub Leipzig: Europe's most modern air cargo hub with 24 / 7 service
- Saxony's economy has grown about 14% since the year 2010; thus, exhibiting the second highest GDP growth rate of all federal states in Germany
- 95 % of Saxony's workforce possess at least a university entrance qualification / completed vocational training (OECD average = 78 %)
- Saxony is one of the „strong innovators“ within the EU
- Saxony enchants - with marvelous landscapes and cultural highlights
